UPDATE: Flight operations suspended for Mission Profile 02 pending formal request from the PM of Tonga.

Based on open and proprietary sources, we have been able to confirm the USS Sampson has maintained a presence within 70km of the island of Kao for the last three days.

At this time, I feel it would be a misuse of resources to continue planning Mission 02 at the level we have. We will divert ALL efforts and resources back to Mission 01.

You can see some of the information used to make this decision on the repo:

Here is a video of the USS Sampson demonstrating their flight capabilities in the Pacific Ocean prior to their response to Tonga:

#### USS Sampson Conducts Flight Operations

SOUTH PACIFIC OCEAN (Jan. 19, 2022) An MH-60R Seahawk Helicopter assigned to the "Scorpions" of Helicopter Maritime Strike Squadron (HSM) 49 takes off from the Arlei...
